

Geomagnetic Indices K and C for 1960 at Kakioka

By KAKIOKA MAGNETIC OBSERVATORY

Table 1 shows the adopted scale values reduced to the base-line for horizontal and vertical components of magnetograms; the γ -scale values for the declination being $6.15\gamma/\text{mm}$. The adopted a-factors, which are determined by the scale value measurements in this period, $0.006\gamma/\text{mm/mm}$ for the horizontal component and, for the vertical component, $0.001\gamma/\text{mm/mm}$.

The figures in Table 2 represent the "three-hour-range" indices K and geomagnetic character figures C, where the lower limit value for $K=9$ is 300γ . In this table, figures in the bracket are pure K-figures in case of s.f.e.

Table 1. The adopted scale values of variometers
reduced to base-line for H and Z.
unit : $\gamma/\text{mm.}$ (1960)

Month	H	Z
